THE TWENTIETH CENTURY.

Practical Illustration That It Begins January 1, 1901.

Editor Advertiser: Regarding the question as to whether this is the last year of the nineteenth or the first year of the twentieth century, let us assume, for the purposes of illustration, that John Doe was born immediately after midnight on the 1st day of January, A. D. 1, and that he is still living. Immediately after midnight on the 1st day of January, A. D. 2, he was one year old and at once entered upon the second year of his existence, and so on to the present time.

Immediately after midnight on the 1st day of January, A. D. 1900, he was 1899 years old, and he is now in the 1900th year, or nineteenth century, of his existence. Immediately after midnight on the 1st day of January, A. D. 1901, he will be 1900 years old, still living, and at the threshold of the 2000th year, or twentieth century, of his existence.

Therefore the year A. D. 1900 is the last of the nineteenth century. The twentieth century will begin with the 1st day of January, A. D. 1901.
